Letter of Recommendation

To Whom It May Concern,

It is with great pleasure that I write this letter of recommendation for Mr. Barshan Mondal, a student at Amrita Vishwa Vidyapeetham, who has consistently demonstrated exceptional academic ability, leadership, and character. I am pleased to share my insights based on my experience mentoring him in the Electronic Material Sciences course. Barshan's ability to grasp complex concepts and apply them effectively sets him apart as an outstanding student.

Barshan consistently excelled in the course I taught, maintaining a strong academic record. He was punctual with assignments and actively engaged in class discussions. His deep understanding of core concepts was evident in both his participation and exam performance.

Barshan's passion for research is evident in his contributions to cutting-edge projects and his ability to explore innovative solutions. He is conducting research on mmWave applications with Dielectric Resonators, where he investigates dielectric material properties to optimize antenna performance for advanced wireless technologies. His analytical approach and creative problem-solving have significantly enriched this project. He remains committed to staying at the forefront of technological advancements while demonstrating an independent and inventive approach to problem-solving.

I strongly support Barshan's admission to the Student Research Internships 2026 (DIGS-ILS/IMPRS-CellDevoSys). His dedication to learning and strong work ethic will make him a valuable addition to your institution.

Yours sincerely,

Dr. Balakrishnan Shankar
Dean, School of Engineering,
Amrita Vishwa Vidyapeetham,
